discussion posted 9 days ago by GordonFern

Thank you for the excellent course. Is there any news on whether part 2 and part 3 will be released with approximate dates.

After the part one, we leant some technical limitations and capabilities to implement an engineering course. We will evaluate on this and study the post course survey feedbacks to design the implementation of subsequent parts before the actual production. Stay tuned, we will send out more information soon.

Please don't take too much time to re-think about it, since we are already on track, and we would like to continue if you are available as soon as possible with part 2 at least.

I too came here today to find out if and when parts 2 and 3 of this course would be offered, and if so when that would be. I'm never 100% sure if I can commit to future online courses, since I'm job searching, and a job

11/20/2014 06:07 AM

would come first of course unless you can handle online courses as well. But I <https://courses.edx.org/courses/HKUSTx/ELEC1200.1x/3T2014...>
am curious since I did do part 1, so please let us know when you do! In any
case, thank you for a great part 1 of the course, and best wishes to you all in the
future. ;-)
