Help

The remainder of this section contains videos and exercises to help you get more familiar with the MATLAB programming environment. These exercises are not graded, and are not included in the course assessment. However, we encourage you to go through them if you are not familiar with MATLAB. We will be providing pointers to helpful parts of this section in the lab exercises where we feel the knowledge contained in these parts would be especially helpful in completing the assignments.

## TABLE OF CONTENTS

- What is MATLAB?
- MATLAB Variables
- MATLAB as a Calculator
- Creating Uniformly Spaced Vectors
- Array Creation Functions
- Conditional Data Selection
- Accessing Elements of a Vector
- Creating Vectors via Concatentation
- Creating Matrices
- Vector Arithmetic
- String Variables
- Logical Operators
- For Loops
- If-Else Statements
- Creating and Customizing Plots
- Multiple Plots
