Final Exam Details

Dear Students,

The final exam will be released on **Tuesday 4 Nov 2014 9:00 (GMT+8)**. You will be able to access the final exam in the **Final Exam** folder. The final exam contributes 50% to your course grade. It will consist of five equally weighted parts: Bit Representation and LTI Systems, Communication Protocols, Intersymbol Interference and Equalization, Noise and Bit Errors, and Channel Coding. Each part will contain a mixture of multiple choice and fill in the blank questions, and a MATLAB-based problem.

You can start answering the final exam, when it is ready, at your own convenience. The exam is designed to be completed in three hours. The final exam must be completed by **Monday 10 Nov 2014 23:59 (GMT+8)**. Take note that you are responsible for checking the time difference between Hong Kong and your current local time, and factoring in the effect of potential Internet or connection difficulties.

Also note that once the final exam is ready, the New Post function on the Discussion page will be disabled. Thus, you will not be able to post anything, but you can still read previous discussion posts. The Discussion page will be open for new posts immediately after the final exam closes. All technical problems and/or questions related to final exam access must be sent to hkustx.elec1200.1x@gmail.com. We will try to respond to your questions as soon as possible.

You must follow the honor code to complete the exam based on your own independent effort. Good luck!

Warm regards,

Bert and Song
