I completed the final exam this morning and I wanted to thank you for the opportunity to take this free online course on EdX in "A System's View of Communications: From Signals To Packets Part 1". I did the best I could in terms of grade with the time I had and learned a lot from taking it, even in the cases where I got the problem incorrect, or I was too busy with other responsibilities to complete something in any given week, I made sure to learn from that after the due date too. So I did well enough to earn a certificate, but the most important thing is to take with you what you learned from the experience. Thank you! I might be back in the future for parts 2 or 3 depending on how life goes! If for some reason I can't, best wishes to all in the future.
